CANADA WILL FLOAT FINAL VICTORY LOAN

Total of \$656,000,000 for Current Year Needed, Estimates Show.

INCOME IS \$280,000,000

Tariff Must Be Cut if Dominion Competes With U. S., Is Belief.

By a Staff Correspondent of Tan Bon. OTTAWA, Ontario, July 1 .- Supplemen tary estimates were presented to the house to-day by the Minister of Finance amounting to \$36,723,120, bringing the total for the current year up to \$656,000,-000, against which the revenue is estimated at \$280,000,000. To meet the demand of war finance, the Government proposes to float a final victory loan, fier which it will be incumbent on the administration to maintain a close bal-ance between revenue and expenditure. ance between revenue and expenditure.

Criticism of the Government's fiscal policy was offered by Michael Clark, member for Red Deer, Alberta. Revenue from customs in the United States for 1918 amounted to \$182,758,985, in a country with over one Mindred million people. For the current year the Government of Canada estimates to collect \$145,000,000 from eight million people in this country. Mr. Clark said the Underwood tariff of 1913 had cut the rate on dutiable goods from 40.12 in 1912 to \$1.15 in 1918, and drew a parallel with peel's tariff of 1842 and repeal of the 21. In in 1918, and drew a parallel with Peel's tariff of 1842 and repeal of the corn laws in 1846. It would not be possible for any administration to work a quick change in the present fiscal system of the United States. If Canada wanted to compete with the United States as a cheap and desirable place to e in, the tariff must come down.

It was all right to follow American example and create a board of com-merce, which would have limited value in this country, as was the case in the United States; but it would be better to

on tariff and finance, to make Canada more prosperous and contented. Reduction in Tariff.

American leadership and example

The average rate on dutiable imports into Canada in 1917 was 23.64. Substantial reductions in the tariff outlined the budget provide for free wheat, po-toes, flour, clothing, boots and shoes; out 10 per cent less duty on agricultoral implements and other commodities for farmers. The Government has given order that thorough inquiry will be made into trade and tariff conditions with a view to revision at the autumn ession, in order to put the tariff on a sound economic basis, fair to consumer as well as to the producer.

It is estimated that for the current year \$20,000,000 will be collected from income taxation. \$35,000,000 from the

business profits tax and \$14,000,000 from other war taxes. The main estimates, as originally pre-

sented by the Minister of Finance sented by the Minister of Finance, call for \$437.679,071, of which \$106,847.443 is for interest on public debt, including \$21,843.449 for redemption of the na-tional debt. To that should be added \$22,090,000 for war service gratuity and \$90,000,000 for demobilization, bringing the main estimates up to the total of \$22,000,000

Finahcially Canada is on a war basis financially Canada is on a war basis for the current figcal year, the total outlay for that purpose being estimated at \$300,000,000. A vision of the per-manent war burden is seen in the in-terest charges given, as compared with \$12,883,000 before the war. The sum of \$28,000,000 is appropriated for sol-\$25,000,000 is appropriated for sol dier land settlement and \$20,000,000 for estimated pensions expenditure, \$5,600. for vocational training, and \$3,-0,000 for medical treatment of returned soldiers and sailors, as well as provision for artificial limbs. There are two items of \$500,000 each to pay for Canada's share of the imperial war graves commission and to provide bat-tlefield memorials in France and Bel-

Sums Asked for Defence.

The modest sum of \$250,000 is asked "2ir service." The "permanent ree" or "regular army," chiefly enfor "zir service." The force of "regular army," chiefly engued on staff and instructional duty, is increased from five to ten thousand men, which calls for an additional vote of \$3.496,986, bringing the total for the sarmy up to \$4,071,986 for the year, exclusive of demobilization and overseas clusive of demobilization and overseas an additional ten milions is asked for the Government ship-building porgramme, making the year's oral \$30,900,000. Two interesting les-ier important nems are one for \$15.—Lindset, Anst, Michigan City (WS). Lindset, Anst, Michigan City (WS). Lindset, Anst, Michigan City (WS). Lindset, Lawis B., La Grange (WS). \$200,000 for combating venereal dis-cases in cooperation with the provinces: As aid and incentive to readjustment \$25,000,000 was voted by way of loans to the several provincial Governments for promoting better housing conditions, and \$20,000,000 to be spent on good roads in cooperation with the provinces ver a term of five years. In addition to that the sum of 135,000,000 was authorized as a loan the Canadian Northern Railway, a subsidiary corporation of the Canadian National Railways Public Service Cororation. Parliament also voted \$35,ass, 600 to be spent on rallway equip-ment for the National Rallways, in preparation for the increased traffic which will surely come in the develop-ment of Canada in the not distant

National Debt of Canada.

Sir Thomas White estimates the national debt of Canada will stand at \$1,550,000,000 on March \$1, end of Canada's fiscal year, by which date rect outlay for war will be at an end. Iffect outlay for war will be at an end, had amounts to about \$220 per capita of the population, and is less than the per capita debt of the United States, aseer capita debt of the United States, ascoming the ten billions in loans to the Allies are worth par value.

The national wealth of Canada is es-

finated at twenty billions, without al-lowing anything for the vast acreage of wild fertile land, the undeveloped mineral ealth, the great forests and fisheries out under exploitation. Hence there are great possibilities for increasing the nat under exploitation. Hence there are less than two years in the war, is such as to cause satisfaction to Canada with respect to the post-war condition of our

The international trade of Canada rose to \$2,550,000,000 in 1918, with the bal-in finance before going into politics. He shee in Canada's favor of \$950,000,000 is a university man, was a newspaper as between imports and exports. For the current year there will be a decrease, but the figures for April and May show scientific finance. He is naturally of a but the favorable balances quality not usually associated with

\$\foatharpoonup \text{200,000,000}, but the favorable balances year by year during the war have innounted to more than the entire war said and the control of this country.

Savings deposits in Canadian banks amounted to \$1,604,645,024 on March \$1,1919, as compared with \$993,191,567 six years ago. Canada is getting back to a gold basis according to the Minister of Finance. The statutory requirement calls for 25 per cent. In gold up to fifty millions, on note issues, and dollar for dollar on further issues.

On this subject Sir Thomas White reports: Total Dominion notes outstanding March \$1, 1919, \$258,058,697.

of which \$153,650,697 is secured to the

GOLD RESERVE IS INTACT

United States Practically Has Only Free Gold Market in World.

WASHINGTON, July 3 .- The Federal Reserve Bulletin for July has been completed. Much matter contained in it re-lates to two important questions which have been before the board during the last month, the problem of export financ-ing and the raising of the embargo on gold and foreign exchange. With reference to the question of export financing the board calls attention first of all to the fact that the oversight and direction Casualty Corrections.

The following cabled corrections are issued as an appendix to the regular casualty lists at the request of the several press associations:

DIED, PREVIOUSLY REPORTED KILED IN ACTION.

Privates.

Privates.

BETHWISCH REPORTED CARS What is exported will constitute a deduction from the total needed supply, which will leave the buyer with inadequate. which will leave the buyer with inadequate which will leave the buyer with inadequate means of meeting his requirements. Ex-cessive shipments of goods, therefore, signify, even when buyers abroad are solvent and able to repay advances at some reasonable date in the future, a deduction from home consumption, which will leave the consumer in the United States in a less favorable position than he would otherwise have been. The value of our present excess of exports, announced as \$277,000,000 for May, is still the outgrowth of war.

"The export situation is possibly of most direct importance to the domestic consumer in a way that is very frequently overlooked. This is in connectional transfer of the still of the s tion with prices. Increased credit de-mand for goods for export necessarily implies relatively decreased supply of

> supply are automatically equalized by changes in price, but such changes in price are, in the circumstances here under consideration, necessarily upward. Effect of Export Financing. "The domestic consumer, when asked The domestic consumer, when asked to finance export trade, should remember that the outstanding effect of such financing on too great a scale would necessarily be the exaggeration of the prices which he himself must pay for the things he needs. This necessarily means that he is in a sense bidding againt himself when he enables others againt himself when he enables others

goods for domestic use. Demand and

to purchase over freely with the funds which he has supplied. "There is necessary opposition of in-terest between the domestic and export trade in such circumstances as that which existed between needs of the Government and those of private in-dividuals during the war. There is the same argument in favor of the exercise of thrift by domestic buyers in order that they may provide the saved funds necessary to finance the movement of goods abroad that there was in con-nection with the purchase of Government obligations. It is for this reason that the amount of export trade securities to be purchased and held by banks must necessarily be limited to a minimum figure that there may be no danger of unduly increasing the total amount of such obligations which find a place in the portfolios of banking establishments and which to that extent tend to create the kind of inflation that results from the purchase and carrying an undue amount urchase and carrying an undue amount f long term obligations by institutions engaged in providing purchasing power

Result of Gold Embargo

"The gold embargo has resulted in the ssuance by the board of approximately ,142 licenses for the shipment of \$152. 326.376 of gold, about 1,500 licenses covering \$502,766,003 of silver and about 1,817 licenses covering \$205,170,700 of currency other than United States gold and silver currency other than BOULING Charles, Charlettsville, V.
